

Postdoc positions

Two Postdoc positions open in the OROBOROS Mitochondrial Research Laboratory for scientific projects on mitochondrial respiratory control in collaboration with the Medical University of Innsbruck (MitoCom, Prof. Erich Gnaiger).

The scientists with postdoc experience are expected to take a leading role in their respective research areas in the Mitochondrial Research Laboratory of Prof. Erich Gnaiger, where the latest techniques in O₂k-Fluorometry and O₂k-Spectrophotometry are available and a Power-O₂k approach with up to 10 O₂k-instruments (20 chambers) provides the basis of high-output in high-resolution respirometry. The candidates should have strong publication records demonstrating her/his conceptual competence in the field of mitochondrial physiology and writing skills. The positions can be filled immediately.

The candidates should submit her/his application with CV and the best three publications to:

Erich.Gnaiger@oroboros.at

Innsbruck - the city in the Alps: Tyrol and its capital Innsbruck offer the highest standards of quality of life in Austria, combining the unique alpine surroundings with an excellent infrastructure. High living standards include international schools, a very good health care system, political stability and outdoor sport activities on the doorstep, e.g. skiing, hiking, mountain climbing.
