104th Workshop on O2k high-resolution respirometry & O2k-Fluorometry

2015 August 09-10
Greenville, NC, USA

Pre-conference workshop:
[MiPschool Greenville](#) 2015, USA.
August 09-10

Venue:

East Carolina Diabetes & Obesity Institute
East Carolina University
East Carolina Heart Institute Building at ECU

Host:

P. Darrell Neufer, PhD, Professor, Director ECDIO
David A. Brown, PhD, Associate Professor
Ashley Busada
East Carolina University, Brody School of Medicine, NC, USA
neuferp@ecu.edu, brownda@ecu.edu, busadaa14@ecu.edu
http://wiki.orooboros.at/index.php/US_NC_Greenville_Neufer_PD

Lecturers and tutors:

Erich Gnaiger, Ao.Univ.-Prof. PhD
Carolina Doerrier, PhD
Verena Laner, MSc

This O2k-Workshop on high-resolution respirometry and O2k-Fluorometry is held in cooperation with one of our prominent O2k-Network Labs in Greenville: [US NC Greenville Neufer PD](#). The O2k-Workshop includes a basic introduction to quality control of instrumental performance of the **OROBOROS O2k** with integrated on-line analysis, introducing new features of **DatLab 6**.

The workshop will include a discussion on optimization of OXPHOS analysis in various mitochondrial (mt) preparations (permeabilized muscle fibres, tissue homogenate, isolated mitochondria). HRR provides information on cell respiration with simple phosphorylation control protocols. State-of-the-art OXPHOS analysis is extended using mt-preparations, to evaluate coupling efficiencies and OXPHOS capacities with carbohydrate versus fatty acid substrates, and to diagnose defects in respiratory complexes of the electron transfer system and phosphorylation system. Novel developments are presented on **substrate-uncoupler-inhibitor titration (SUIT) protocols** in HRR using the **O2k-Fluorescence LED2-Module** for simultaneous measurement of hydrogen peroxide production (Amplex red®). Discussions are extended on comparison of measurement of mt-membrane potential using Safranin (fluorometric) versus TPP⁺ or TPMP⁺ (potentiometric), and on perspectives of HRR in mitochondrial physiology.

Program IOC

Sunday, August 09:

08:45 Registration
 09:00 – 09:15 Welcome
 09:15 – 09:30 Introduction of participants: who is who?
 09:30 – 10:30 Erich Gnaiger: Get started with the O2k.
 10:30 Coffee break – Registration ctn.
 11:00 – 12:15 Pro’s and con’s of mt-preparations: Coupling and substrate control of O₂ consumption and H₂O₂ production in homogenate, permeabilized fibres – or isolated mitochondria?
 12:15 – 12:30 Permeabilized fibre preparation – what to take care of?
 12:30 Lunch
 13:15 – 14:00 Phosphorylation protocol for intact cells.
 14:00 – 15:00 Comprehensive OXPHOS analysis: A challenge for simultaneous measurements of respiration and mt-membrane potential: solving a puzzle.
 15:00 – 15:30 Experimental setup 1: OroboPOS - sensor quality control, calibration.
 15:30 Coffee Break
 16:00 – 17:00 Experimental setup 2: Calibration of O2k-Fluo Sensors
 17:00 – 17:30 Neuffer P. Darrel: Sharing our experience as an O2k-Network Lab.
 17:30 – 18:00 Q&A session on HRR and OXPHOS analysis: Design of experimental protocol - day 2.
 18:30 O2k-Workshop dinner

Monday, August 10:

08:30 – 10:30 Experiment: HRR and O2k-Fluorometry with intact cells – respiration and extracellular H₂O₂ production.
 10:30 Coffee break
 11:00 – 12:00 Experiment continued
 12:00 Lunch
 12:45 – 15:30 Data analysis
 15:30 Coffee break
 16:00 – 16:40 Technical support
 16:40 – 18:00 Feedback – conclusions – stay connected as an O2k-Network Lab
